MEMBERS EMBLEM
FOR OUTDOOR SIGNS
LENGTH 1/8 INCHES THICK

SHIELD SIGN DIMENSIONS

- WIDTH—Red-yellow field six times the width of the white band.
- LENGTH—1/6 longer than width. The black border background is from 1 to 2 ins.—just enough to set off the shield; black moulding instead of plain paint is nicer.
- DISTANCE FROM GROUND—Where headlights at night will spot them; top 6 ft. from ground is about right.
- LETTERING—Heavy block letters, deeper than wide.
- SIZE—Avoid oversize; big signs and big letters are not quickly read and look cumbersome. Above signs are 24x28 ins.

THE SHIELD DESIGN is from old Spanish art works and heraldry.

BOULEVARD LIGHT SIGNS

The boulevard light signs will be supplied for \$125 ea., f.o.b. San Antonio. Heavy 18 gauge steel, rust-resisting coated, weather-proof baked enamel, deeply embossed, 20 ins. long.
