

for its success.

To say that the 123 granite boulders  
are set up correctly according  
to contract I cannot say only up  
to the Comal and Hays boundary  
line, and this I do know from  
the County Survey from the Sabine  
River to the San Marcos river.

The markers are all being hauled  
out from Cattarina Station where they  
were abandoned by Mr. A. L. Groch,  
and are being erected in concrete  
to the Rio Grande River by Mr  
Barker of Carro Springs. Judge  
Arthur Wildenthal, an old  
friend went out and inspected work  
found two markers not set in concrete  
(a cow could turn them over) and  
these two markers will be set in  
concrete so when rubbed by cattle will  
stand. The 8 left at station are being hauled out.  
Will you please write for me to  
Judge A. Wildenthal Carro Springs,  
who has the books of surveys  
and tell him just where you
