

March 6, 1922

Mr. Percy Tyrrell,
Cunter Hotel.

Dear Percy,-

I am glad you wrote to me. In the first place you are not one of the "has-beens" but one of the most helpful real fellows we have. You will see by the enclosed where I have turned a leaf down, where you stand.

Also, as you know, I never lose a chance to say, Headquarters, Cunter Hotel. It should have been on that bulletin.

There are other things however that are serious, and I have been on the point two or three times of writing to you. I will pass over the very crude printing and grammatical work on that bulletin; you know the type of printed matter I put out is high.

Dr. Johnston, however, has re-organized my office force, made the stenographer, "Private Secretary to the President" and put her on the letterhead, and given Mr. Colp a designation contrary to my arrangements. Of course I will not accept this sort of thing and serious things can happen to this work we all love unless there is some friendly way for the Doctor to realize that self-respecting men do not stand for such things.

What would you do if you were away for awhile on business for the hotel and while away Mr. Hart made your stenographer "Secretary to the President" and put her on the letterhead, and he also made other changes in your organization?

I have just received some statements from the office. I find that in the year 1921 I received from the OST \$750 for services. What Dr. Johnston is thinking of when a man has given service that way I don't know.

I have also taken care of all my expenses over here the past 10 weeks and sent \$300 over there to help them.

I expect to be back shortly after the 20th. The enclosed shows what I am doing. I expect to get this 8-mile bridge across the bay and everything lined up and GOING between New Orleans and Tallahassee. If I do all difficult problems will be solved. That will be some achievement for less than three months. I am very much hurt, when I am doing things like this, that such things should be pulled over there. Best of regards,
