

last people the Dolwing interests. You perhaps know these crackers and their nice "out in the open" attitude towards those not wanted, so you can guess the rest.

We are about forty eight miles from Gainesville, same distance from Occoia, thirty from Dunnellon; 120 from Jacksonville and about that ~~part~~ from Tampa. Not many miles from Key West. Otter Creek is six miles away, Archer twenty and Bronson some where up that same road. In other words we are a small town owned by the lumber company, located about center of twenty years out of hardwood mixed timber. Yes the mosquitoes were here first and seem to intend to remain. The first question you should ask if you ever come here is not "Have you used Pears Soap" but--"How is your malaria this morning" or "Are the fleas still bad around your house" and "Do you have any idea just when the knats will call it a season and depart?". But aside from all this everything is alright, thank you.

Write to us sometime and tell us all about your work and future plans along this life work of yours, it has always interested me I can assure you, that is why back in those days, seemingly ages ago, I loved to criticise it so.

All the family send their best wishes for the future for you and your splendid work.

Sincerely your friend,

Carrie Baykin
